

Classic 300 Evolution Milking Unit

The industry standard...
now enhanced for today's cows

engineering for
a better world

gea.com

Durable design — made of high grade stainless steel and the strongest and longest lasting composite material in the industry.

Easy to see milk flow — 360° visibility.

High capacity — 10.5 ounce (300 cc) collection bowl easily handles high volume milk flow while maintaining vacuum level.

Gentle to cows — improved vacuum stability.

Versatile — fits any size udder, available with or without automatic shut-off; ideal for both parlors and stanchion/tie stall barns.

Spoon-shaped milk inlets — ensure that the short milk tube remains flexible enough for proper alignment.

Adjustable — for parallel and conventional parlors, claw top pivots 180° on bottom.

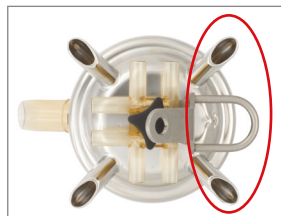

Easy to clean — no corners, smooth hygienic finish.

Outlet with 22° angle — moves milk out quickly.

Ideal milk inlet angle — ensures proper alignment.

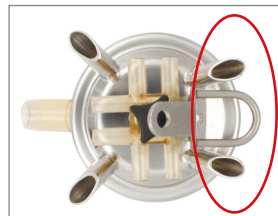

Classic 300 or Classic 300E — choose the unit that best fits the udder configuration in your herd.

Classic 300 Milking Unit

The industry standard. The Classic 300 features the original milk inlet position for normal to wide rear teat placement.

Classic 300 Evolution Milking Unit

This modern design is enhanced for today's cows. The Classic 300 E features a revised milk inlet position for narrow to normal rear teat placement.
