Convert your data into information you can use!

Metatron Select 21
Metatron Premium 21

Whatever your management style, DairyPlan C21 will help you obtain the information you need in a clear and easy manner through the latest software technology with user friendly displays and accurate reports.

Evaluating, Analyzing, Monitoring, Benchmarking and Planning: DairyPlan C21 offers the right software tools for successful management of your complete herd — from calves to milking cows to dry cows.

Reproduction and herd health management

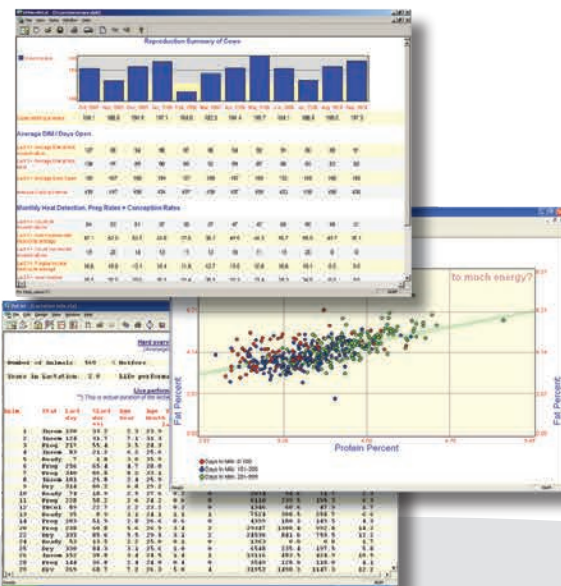

- Review and manage reproductive efficiencies
- Pinpoint problem cows — fertility, mastitis and other health problems
- Forecast milking cow numbers, dry cows and number of calvings
- Organize herd health checks, vaccination and synchronization programs
- Evaluate statistics on ailments and treatments
- Detect heats on milking animals and youngstock with activity monitoring
- Record and evaluate Body Condition Scores

Milk production management

- Monitor milk production — daily, monthly and yearly averages
- Prevent lactation pitfalls and keep production where it should be
- Identify and treat exception cows immediately
- Integrate component test results by herd or by individual
- Manage and view milking routines from the computer
- Evaluate milk flow and production data
- Measure milk conductivity and better monitor mastitis

System management

- Regulate and monitor connected hardware components
- Analyze parlor performance and work flow routines
- Sort animals automatically by setting criteria in software
- Monitor parlor washing performance
- Manage concentrate feeding
- Interface with tank controls to record milk temperatures
- Automatically weigh animals and record body weights on the move
- Monitor DairyFeed calf feeders and manage youngstock
