

Compass Plus™ Wash Control Center

Take control of parlor sanitation

Diverter programs — three diverter outputs with four program options allow diverting separate wash cycles so you can use waste water elsewhere.

Custom blending — two-part wash chemicals can be custom blended to meet changing conditions and to keep separate components fresher.

Programmable settings — can be custom configured with over 50 programmable options to make the best use of water, chemicals and time. Sanitize start time can be automated.

Four cycle wash program

- Pre-rinse
- Main wash
- Acid rinse
- Optional pre-milk sanitizing

Compass Plus stand-alone wash control

Compass Plus stand-alone wash control can be used in facilities with a separate milk-off-wash control. Optional temperature monitoring stores wash temperatures for the previous 16 wash cycles. Can be programmed to end the wash cycle if the wash water temperature falls below a certain temperature.

Compass Plus with parlor control

Compass Plus with parlor control incorporates a milk-off-wash mode switch to control the operation of other devices that require a milk or wash signal. Two switches manually operate up to two receiver milk pumps.

P1200 pump

P Series Peristaltic pumps are available as a companion to the Compass Plus or as a chemical dispenser capable of operating with almost any wash controller.

P600 pump

Available in two sizes:

- P600 (600ml or 20 oz. per minute)
- P1200 (1200ml or 40 oz. per minute)
